# UM2 SuperMount

## Universal Portable Antenna Mount

Like a multi-mode swiss knife to mount your Super Antenna anywhere, the UM2 lightweight portable attachment provides a solid base for the MP1 SuperStick Portable Vertical. Easily set your antenna element to swivel at any angle, for best DX or NVIS propagation. It is the perfect component to include in your Go-Bag for ultra-compact travel and EmComm readiness. Optimum-designed for DXpeditions, semi-permanent installations, and temporary portable base setups. Be prepared for any operating situation you encounter: hotel, apartment, flat, office of emergency communications, backyard, building, or garden fence.
